

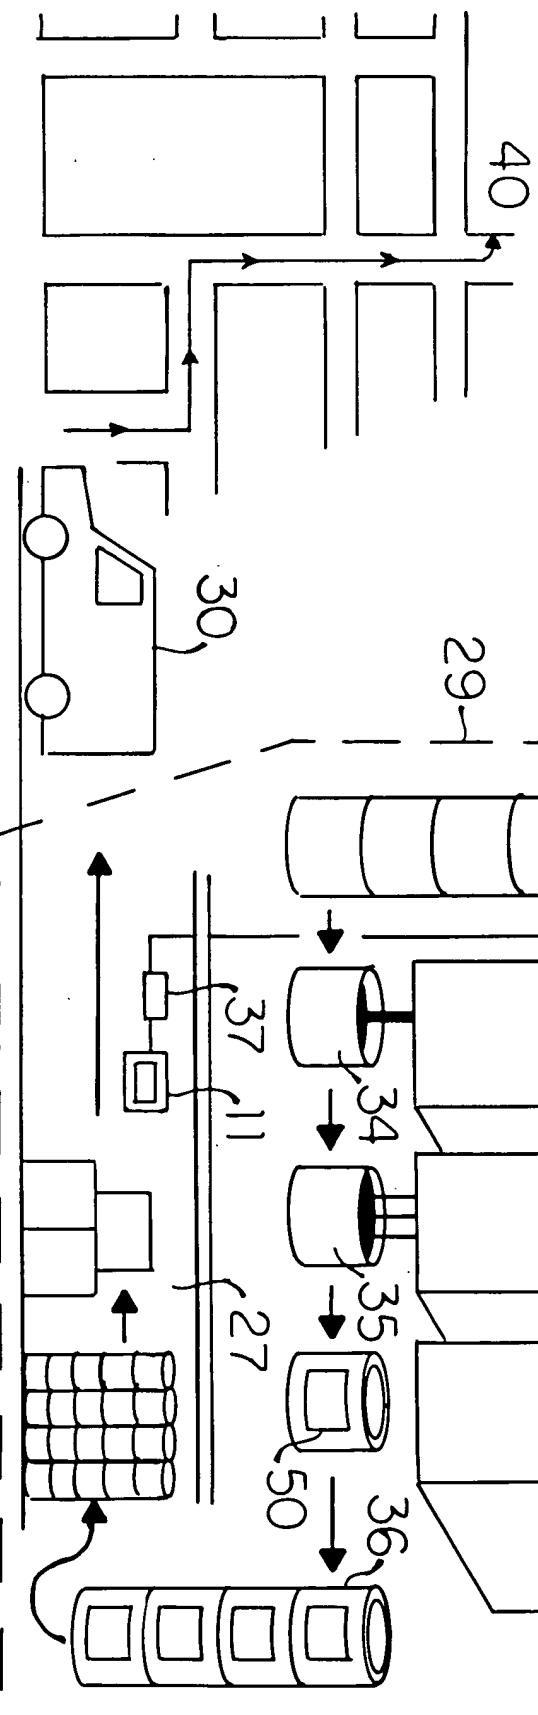

FIG. 1

FIG. 1 is a schematic diagram of a computer system architecture. A user (10) is seated at a desk, interacting with a computer terminal (11) consisting of a monitor (14) and a keyboard (15). The terminal is connected to a central processing unit (12) and a printer (13). The system is connected to a Public Branch Exchange (PBX) (16) via a line (17). The PBX is connected to a network of storage devices (20, 21) and a series of storage units (24, 25, 26). A data bus (27) connects the storage units to a control unit (30) and a stack of storage units (36). A printer (34) and a scanner (35) are also connected to the system. A large storage unit (40) is shown at the bottom.
